

FOR IMMEDIATE RELEASE

ACR Group Acquires Leading Iridium Satellite Connectivity Solutions Firm Blue Sky Network

Fort Lauderdale, FL, May 9, 2022 – ACR Group Corporation (“ACR Group”), a technology company committed to innovation in satellite communications and assured positioning, navigation, and timing solutions for the aerospace, government & military, and outdoor & marine markets, today announced the acquisition of Blue Sky Network, a pioneer in the development of satellite tracking systems and two-way communication for remotely active private, commercial, and government fleets.

Founded in 2000, and headquartered in San Diego, California, Blue Sky Network specializes in the design and delivery of communication, IoT, and fleet management solutions for land, air, and sea operations. Today, Blue Sky Network serves over 450 customers and dealers in more than 50 countries.

“The importance of reliability and connectivity is paramount for austere environments. Blue Sky Network brings industry leading innovation and answers that solve these challenges for each of our core market segments within the ACR Group,” said David Knowles, President and CEO, ACR Group. “We are excited at the capabilities this acquisition will bring to the ACR Group and its technology brands.”

Blue Sky Network will retain its existing management team, products, brand, engineering capabilities, and sales capabilities. The company will join ACR Group’s portfolio of companies which include, but are not limited to, SKYTRAC, NAL Research and ACR Electronics, to deliver mission-critical tracking and satellite connectivity solutions on a global scale to enterprise, governmental and recreational users.

“Blue Sky Network is proud to be part of the ACR Group of brands and products. We share a passion for evolving the customer experience and the importance of remote communications,” said Tucker Morrison, CEO, Blue Sky Network. “In joining the ACR Group, we are extending our offering of SATCOM solutions across industries and market sectors, providing customers with customized and reliable connectivity around the globe.”

As per company policy, financial terms of the acquisition will not be released.
